STYLISH, SIMPLE, EFFORTLESS.

FORM AND FUNCTION ARE IN PERFECT HARMONY WHEREVER YOU LOOK ON THE CITROËN C1.

THE CURVES AND FORMS AND TECHNOLOGY THAT MAKE IT UNIQUELY DISTINCTIVE, ALSO MAKE IT EASY, FUN AND SAFE TO TRAVEL IN. FROM THOSE SHORT OVERHANGS AND ROBUST BUMPERS TO THE CLEVERLY PLACED CLEAR CONTROLS, THE DETAILS MAKE A WORLD OF DIFFERENCE.

Vital driving controls are grouped closely around the steering wheel for fingertip control, so the driver can concentrate on the main event – driving. An amazingly tight turning circle and standard variable power assisted steering also makes the Citroën C1 perfectly adapted to nipping about in the city, whilst the clear and bold speedometer really adds to the sense of fun.

› LIGHT FANTASTIC

Elevated rounded headlamps make the Citroën C1's characterful face instantly recognisable. The transparent rear light clusters house eye-catching triangular crystal designs. The uniquely shaped, manually adjustable door mirrors blend beautifully into the fresh, friendly overall design.

› GO WITH THE GLOW

Using a backlit translucent material, the heating control panel glows a friendly, easy to read orange when the lights are on.

› GO WITH THE FLOW

Even the cabin's air vents harmonise with the Citroën C1's curvy themes – nothing interrupts the flow!

› OUTSIDE IN

A stylish flourish – the upper door panels are painted to match the chosen exterior colour.

FREEDOM IN COMFORT. COMPACT, AGILE AND DESIGNED TO RAISE A SMILE EVERY TIME YOU JUMP IN, THE CITROËN C1 INSPIRES A SENSE OF FREEDOM, EVEN ON THE BUSIEST CITY STREETS.

WHAT'S THE SECRET? A MIXTURE OF VIBRANT STYLING, PRACTICAL THINKING AND PURE VERSATILITY IN ONE UNIQUE PACKAGE.

› HIGH VOLUME

The boot of the Citroën C1 transforms from a useful 139 litres under the parcel shelf, right up to 751 litres with the rear seats folded down. This is still a capacious 712 litres on 3-door models. The large rear window is also a wide opening tailgate for optimum access.

› IT'S ELECTRIC

As you would expect, front electric windows are standard on VTR and VTR+ models for complete convenience.

› MUSIC NON-STOP

A CD Player is standard, and in addition you can plug your MP3 player into the front panel.

› IN THE DETAILS

Even the shape of the main air conditioning switch standard on VTR and VTR+ models echoes the dashboard design and the whole car's vibrant persona.

› SUPERSTORE

The Citroën C1 has no fewer than 12 storage compartments spread between the dashboard, centre console and doors – there are two situated immediately above and below the CD player for really easy access.

› HIDDEN ASSETS

Two cup holders and a 12 volt socket are concealed under the centre console.

SAFE AND ENVIRONMENTALLY SOUND.

IT'S NO SURPRISE THAT AN INNOVATIVE,
EFFICIENT CITY CAR HAS GREAT
ENVIRONMENTAL CREDENTIALS,
BUT CITROËN C1 GOES FURTHER...

MANUAL MODELS PRODUCE CLASS DEFINING CO₂ EMISSIONS OF JUST 103G/KM AND CAN REACH UP TO 70.6MPG ON THE EXTRA URBAN CYCLE, AND EVEN AROUND TOWN THEY WILL RETURN 52.3MPG. EFFICIENCY IS ENGINEERED IN EVERYWHERE.

› NO COMPROMISE PROTECTION

Despite its ingenious compactness, there is nothing minimal about Citroën C1's safety features, with a massively strong passenger compartment and carefully engineered crumple zones, its entire structure is designed to protect.

› LOOKING AFTER EVERYONE

Electronic Brakeforce Distribution (EBD) that keeps your brakes in perfectly balanced control in all conditions and ABS are standard across the range, with Electronic Stability Programme (ESP) fitted as an option on VTR+ models. All models have a driver's and front passenger's airbag, while ISOFIX child seat anchorage points on the rear split/folding 50/50 seats are fitted as standard on VTR+ models. With an immobiliser and remote central locking on VTR and VTR+ models – this is a city car that looks after itself and you, whilst minimising its environmental impact.

PERSONAL CHOICE. THE CITROËN C1 COMES IN THREE DISTINCT FLAVOURS AND TWO BODY STYLES. WHICHEVER FEELS RIGHT, YOU WILL BE CHOOSING A GREAT CITY CAR WITH PERSONALITY TO SPARE.

VT. STREETWISE AND STYLISH.

STEP INTO THE CITROËN C1 VT AND THE VIEW IS INSTANTLY DIFFERENT. NARROW BUSY STREETS LOOK WIDER. PARKING SPACES APPEAR AND GAPS IN THE TRAFFIC SEEM TO GROW. YOU CAN MAKE THE MOST OF IT ALL, THANKS TO THE CLEVER VARIABLE POWER ASSISTED STEERING THAT ADAPTS TO EVERY NEW TWIST AND TURN.

EFFICIENCY MINUS COMPROMISE. CITROËN HAS CREATED FUELEFFICIENT VEHICLES WITHOUT SACRIFICING DRIVER ENJOYMENT FOR SOME TIME. THE LATEST ADVANCES TAKE THIS FINE BALANCE FURTHER STILL...

WITH THE PROVEN CREDENTIALS AND ENVIRONMENTAL PERFORMANCE OF CITROËN HDi DIRECT INJECTION ENGINES AS INSPIRATION, e-HDi ADDS NEW TECHNOLOGY, SUCH AS A SMOOTH, SIMPLE STOP & START SYSTEM AND EGS GEARBOX. THE RESULTS ARE A DRAMATIC REDUCTION IN BOTH FUEL CONSUMPTION AND CO₂ EMISSIONS, COMBINED WITH RESPONSIVE PERFORMANCE WHEREVER YOU GO.

We've been equipping more of our vehicles with more environmentally friendly breakthroughs, such as our Electronic Gearbox System (EGS), which boasts impressively greener credentials, with less pollution and up to 5% more economy than a conventional manual gearbox system. In addition, Citroën has expanded the use of the exceptionally efficient, self-regenerating Diesel Particulate Filter System in our models. Cleaner, greener driving without taking away from the drive – that's what you can continue to expect from Citroën.

› ELECTRIFYING. HOWEVER YOU LOOK AT IT

Forget what you know about electric cars. Citroën Survolt concept combines undiluted glamour with advanced sporting dynamics, then adds a 100% electric drivetrain. Outside, LED lights, voluptuous curves, two-tone charcoal and fuchsia paintwork, and a race-inspired rear spoiler meet your gaze. Inside, a stunning blend of curved chrome, swooping glass, high technology and organic forms welcomes you to an entirely new place. But this is no simple styling exercise. At heart, Survolt is even more radical, because although it is designed to thrill, it is powered purely by silent, efficient, clean electricity.

› AIRDREAM – A BENCHMARK

When it comes to the environment we wanted to show our genuine commitment as well as our profound expertise, so we have devised a benchmarking scheme with the signature 'Airdream'. To qualify for the Airdream signature, vehicles must have an e-HDi or an electric engine.

GLOSSARY

› ANTI-LOCK BRAKING SYSTEM (ABS)

Computer-controlled braking assistance designed to prevent the wheels from locking under extreme braking. This enables the car to continue being steered and therefore controlled during this braking incident. The Citroën C1's ABS system is further enhanced with EBA and EBD.

› ELECTRONIC BRAKEFORCE DISTRIBUTION (EBD)

A conventional ABS system cannot account for any of the four wheels wanting to lock more quickly than the others (for example, two of the wheels may be on snow and two on tarmac). EBD reads the deceleration rate of each wheel individually and applies the ABS principles accordingly.

› CORNERING STABILITY CONTROL (CSC)

When braking on a bend, the weight applied to the wheel on the inside of the turn is less than the weight applied to the wheel on the outside of the turn. If the braking pressure is identical on the wheel on the inside of the turn and on the wheel on the outside of the turn, the vehicle tends to move straight ahead, therefore under-steering. The CSC function distributes the pressure on the right and left wheels in such a way as to slow the vehicle down while guaranteeing its steerability.

› VARIABLE POWER ASSISTED STEERING

A system that provides extra power assistance for a vehicle's steering at low speeds (such as turning a sharp corner) and less assistance during high-speed situations.

› FRONT SEAT BELT PRE-TENSIONERS

In the event of a crash, a pre-tensioner will tighten the seat belt almost instantaneously. This reduces the load on the occupant in a violent crash. Like airbags, pre-tensioners are triggered by sensors in the car's body, and use explosively expanding gas to drive a piston that retracts the belt. Seatbelt pre-tensioners also lower the risk of 'submarining', which is when a passenger slides forward under a loosely worn seat belt.

› RADIO DATA SYSTEM (RDS)

A traffic information on FM radio, allowing the station name and other information to be transmitted alongside audio information.

› ELECTRONIC STABILITY PROGRAMME (ESP)

This is computer-controlled traction assistance and is provided primarily through the braking systems. The ESP's control unit constantly compares where the driver intends going (through the position of the steering wheel) with where the vehicle is actually going and, if necessary, makes speed corrections to each wheel individually through braking or engine torque to keep the vehicle 'in line'.
